

Steps to install and configure Sadad extension on CSCART:

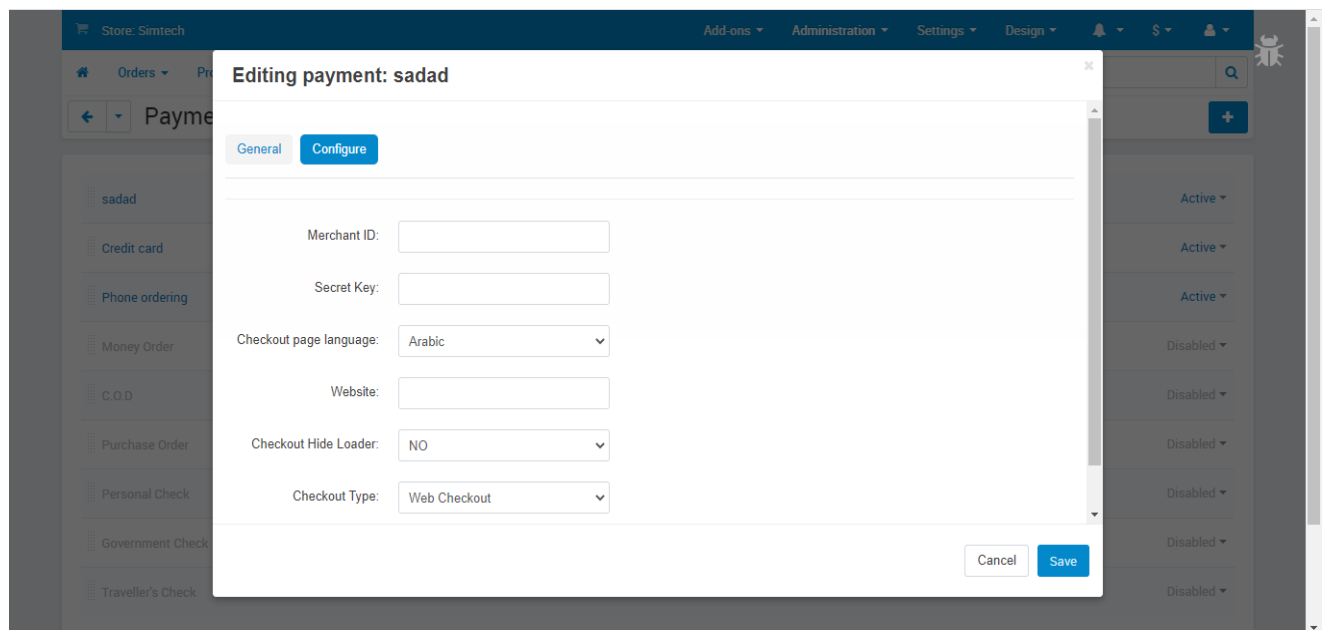

- Login to Administrator and click on Addons >> Manage Add ons.
- Click on “+” icon button from top right to add new addon

- Click on Local and select sadadqa.zip file and then click Upload & install.
- You should see success message and then scroll down to find “Pay with credit/debit card (Sadad)” and make sure its Active.
- Now from top menu go to Administration >> Payment methods and click on “+” icon button from top right.
- Give name and description which you want your users to see on frontend. From Processor dropdown select “Pay with Credit/debit card (Sadad)” option. You can optionally do other settings in other fields like uploading logo, disabling method for certain users etc. Finally click Create. Make sure status is set to Active.

- Now click on this newly added payment method to configure its settings. From top left in popup opened, click Configure tab.

- When you click configure it will open settings page and enter your settings there and make sure you set status as Enabled and the website field should be according to your secret key. Just specify your domain name(website) without http:// or https://. Example value: www.xyz.com Finally click on Update.
- You can use Web checkout 2.2 option only if it is enabled by Sadad administrator. Otherwise you'll get error after clicking Pay now.
- For checkout page, make Shipping Phone field mandatory.
