

Steps to install Sadad QAR payment gateway on Presta Shop:

1. Login to admin of your Prestashop and go to Modules >> Module Manager.
2. Click on Upload module and upload sadadqa.zip. When installed click on Configure.
3. When you click configure it will open settings page and enter your settings there and make sure you set status as Enabled and the website field should be according to your secret key set. (i.e. if your Secret key for domain is set with www, you should select callback URL with www and if non-www, you should select non-www one). Just specify your domain name(website) without http:// or https://. Example value: www.xyz.com Finally click on Update.
4. You can use Web checkout 2.2 option only if it is enabled by Sadad administrator. Otherwise you'll get error after clicking Pay now.
5. On frontend on checkout page, you will see Pay with credit/debit card (Sadad).
6. For changing settings go to Modules >> Module Manager and scroll down and find Sadad QAR and click on Configure button in front of it. It will open settings page like below screenshot.
